

Committee Services

As a senior faculty member at my previous academic home, I had served on many committees at all levels of the university and also took several leadership roles such as director of the graduate program in Applied Statistics and the lead of a cross-college team for creating a data science graduate program. I have been enthusiastically serving on various department committees since I started my first semester at WCU. As a new member of the WCU community, the opportunity to serve on college and university-level committees is very limited and very hard to get in. I still seek different ways to serve the WCU community outlined in other service categories such as survey research service, and data analysis to support campus-wide curricular decision-making for improving students' learning and performance. The following is the outline of committees that I served on and am serving on:

1. Search Committee (Mathematics Education, 2019-2020):
I worked with the committee members to go through the entire search process according to the existing procedures: reviewed all complete applications, rated applicants, selected candidates for Zoom interviews, identified finalists for on-site interviews, and recommended the top candidate to the department. The search was successful!
2. Election Committee (2020-)
Helped the Committee Chair to review the electronic ballots of various department committees.
3. Graduate Committee (2021- 2023)
Attended meetings and discussed several graduate curriculum adjustments, and some students' requests for adjustment of degree requirements. The most recent committee duty was to discuss the ad hoc committee's suggested curriculum of the new MS program merged from MS in Applied Math and MA in pure Math programs.
4. ad hoc MPE, MAT Q20, MAT Q30 Committee (2021)
My role in this committee was to provide data support using placement test scores to make sure that students are correctly placed in Q20 and Q30 so that will excel in subsequent math classes after they complete Q20 and Q30.
5. APSCUF Department Representative (2022-2023)
I attended the regular Zoom meetings unless a teaching conflicts with the meeting schedule.
6. Undergraduate Curriculum Committee (2023-)
I recently joined this committee and hope to contribute to the committee with my extensive experience in curriculum development.
7. Co-director, Ram Institute of Survey Research (2023-)
As outlined in the RISR summary, we are going to provide service to the WCU community and beyond in years to come.
8. CSM RISM Award Review Committee (2019-2020)
I joined the Research in Science and Mathematics (RISM) Award Review Committee and reviewed the submitted 4 proposals worked with the team members to rate the proposals based on the review rubric and selected the final awardees. The acknowledgment letter is [HERE\[link\]](#).
